Hi, I got 2010 Freightliner... Hi, I got 2010 Freightliner Cascadia with DD15 motor. Problem is it has a rough idle, rpms will just go up and down by itself. It also started stalling pretty bad, especially in traffic. I noticed EGR actuator arm opens and closes the valve every 10 seconds or so, while idling, driving fast, driving slow, just does it every 10 sec. this causes stalling and rough idle.

1 04-06-2018, 02:50 AM (This post was last modified: 04-06-2018, 02:54 AM by bigcdiesel .) 2010 Detroit DD15 in Freightliner Cascadia. Owner complaint: truck runs coolant temperature up until stop engine warning and then fan comes on. loaded trailer, pulling and coolant temperature climbs until 250 on gauge, then warning and stop light and fan come on, fan brings temp down and can continue running truck fine in safe coolant zone with fan running continuously.

Detroit DD15 2010 year coolant temperature issues overheat ...  
These problems can impact the engine components and the engine itself (not to mention the DPF). With all this being said, there are several benefits to having DPF delete performed: Better fuel economy: When regeneration occurs, excess fuel is used to "burn" the particulates that have accumulated in the filter.
