For the brand's full-sized runabout class - the FX - there are three variations of performance: the HO, SHO and SVHO. Of course, the Super Vortex High Output package constitutes much more than Yamaha's all-new for 2014 SVHO engine, which takes the Super High Output (SHO) engine and radically increases the overall efficiency by 110-percent.

Each Clymer manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine. This manual covers the Harley Davidson FXD/FLD Dyna Series built from 2012 to 20173. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. Specific models covered include: FXDB Street Bob (2012-2017), FXDB 103 Street Bob (2014-2017), FXDBA Street Bob (2013 Factory Custom), FXDBA 103 Street Bob (2013 Factory Custom, 2015-2016 Limited), FXDBB 103 Street Bob (2016 Limited), FXDBC Street Bob (2016 Limited), FXDBC 103 Street Bob (2016 Limited), FXDBP 103 Street Bob (2013-2016 Factory Custom), FXDC Super Glide Custom (2012-2014), FXDC 103 Super Glide Custom 110th Anniversary (2013), FXDC Super Glide Custom (2014), FXDF Fat Bob (2012-2017), FXDF 103 Fat Bob (2012-2017), FXDL Low Rider (2013-2017), FXDL 103 Low Rider (2014-2017), FXDLS Low Rider S (2017), FXDWG Wide Glide (2012-2017), FXDWG 103 Wide Glide (2012-2017), FLD Switchback (2012-2016), and FLD 103 Switchback (2012-2016).

Protect Your Most Valuable Asset-Your IP Your company's intellectual property is its most important asset. If it's not properly protected, your ideas could be stolen, your products could be copied and you could lose your business. Safeguard your IP with this legal advice from the country's most well-respected IP law firm. Experts in patents, trademarks, copyrights and other protection methods reveal their professional strategies for protecting ideas and avoiding devastating lawsuits. Plus, the enclosed CD gets you started preparing your filings for the U.S. Patent and Trademark Office. Learn how to: Choose the best protection strategy for your business-patents, trademarks or copyrights-and prepare filings for each one Identify your IP and look for prior art Avoid unintentionally infringing on the IP rights of other companies and prevent costly litigation Steer clear of the most common IP traps Use nondisclosure agreements, employee agreements and other protective measures Implement patent strategies into your business plan as a revenue source or to gain a foothold in the market Ensure that your ideas are protected and promote your business' success with these valuable IP strategies. Sample documents include: USPTO Selected Patent Fee Schedule Declaration for Utility or Design Patent Application Form USPTO Trademark Search Form Madrid Protocol Schedule of Fees Term of Copyright Outline Form TX, for a Nondramatic Literary Work Form VA, for a Work of the Visual Arts Form SR, for a Sound Recording Form PA, for a Work of Performing Arts Form SE, for a Serial Copyright Fee Schedule For more than 30 years, Entrepreneur has provided the most trusted business advice available to business owners. Our legal guides continue that tradition by offering current and cost-effective legal advice so you can resolve the business and legal issues you face on a daily basis. We also help you identify when it's in your best interest to seek the personalized advice and services of a practicing lawyer.

Marketplace complexity and dynamics create an environment that increases the uncertainty of innovation activities. In this context systematic management of innovation and product management are increasingly important for company success. This book presents the fundamentals of innovation and product management and introduces the reader to a holistic process model with particular focus on innovation and uncertainty. This integrated consideration of innovation management and product innovation within an interdisciplinary approach represents a unique characteristic of this book. The book is designed to address the needs of managers who want a practical but well-researched guide to innovation and product management. Graduate and advanced undergraduate students would also find the chapters in this book particularly useful.

Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in The Anime Machine he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. The Anime Machine defines the visual characteristics of anime and the meanings generated by those specifically "animetic" effects-the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation-through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP's manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the "animetic machine" encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique-and often humorous-relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each collared canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

A gripping, award-winning novel from the author of "The Missing" and "Souls of Angels."

This book introduces the Eora, Global Trade Analysis Project (GTAP) and World Input-Output (WIOD) databases and provides detailed metadata on the data sources, database structures and construction techniques used to build each system. It offers a detailed account of how multi-regional input-output (MRIO) databases are used to calculate consumption-based accounts - guiding the reader through each mathematical step and explaining the associated equations. It demonstrates that different MRIO databases calculate different national level consumption-based CO2 accounts. If these results are to be used as evidence in climate policy-making, analysts need to be confident about the accuracy of the databases and understand why the results differ. It carefully explains the mathematical equations behind each technique and provides a link to a repository where the reader can access specially prepared MATLAB functions associated with the techniques. To make meaningful comparisons between the three MRIO databases, each is mapped to a consistent classification system comprising 40 countries and 17 sectors. Further, readers can access the aggregated databases using the link provided. The effect of this aggregation is shown to be minimal, so readers can be confident that the aggregated versions of each database reflect the full-sized versions. The book concludes by making recommendations as to how future MRIO databases could be accurately and consistently constructed and how they should be used in policy-making in light of the findings. Endorsement Anne Owen did a splendid job in comparing the most important Global Multiregional Input Output databases (GMRIO) available. She probably is the first to develop a good understanding what factors in GMRIO construction really contribute to uncertainties in carbon footprint analysis. A great achievement, packed in easy to understand language! Prof. Arnold Tukker Scientific director CML Leiden, NL With its thorough investigations and clear explanations of the differences in MRIO databases and outcomes, this book is compulsory reading for both skilled practitioners and scholars when starting any input-output analysis in a multiregional context. Dr. Harry C. Wiltink Senior researcher, environment and economics PBL Netherlands Environmental Assessment Agency, NL A novel exposition on understanding some of the biggest datasets underpinning current global sustainability assessments. Dr. Owen straddles technical incision with practitioner relevant insights and includes a range of methodological advances that will ensure the continued relevance of this work for many years to come. Prof. Richard Wood Industrial Ecology Program NTNU, Norway

Pearson introduces yet another textbook from Professor R. C. Hibbeler - Fluid Mechanics in SI Units - which continues the author's commitment to empower students to master the subject.

The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.
