Support Guidelines
A careful balanced approach with frequent reevaluation is required. Balancing the goal of organ perfusion with the risks of rebleeding by accepting a lower-than-normal blood pressure has been called “controlled resuscitation,” “balanced resuscitation,” “hypotensive resuscitation,” and “permissive hypotension.”

the ninth edition

Advanced trauma life support is a training program for medical providers in the management of acute trauma cases, developed by the American College of Surgeons. Similar programs exist for immediate care providers such as paramedics. The program has been adopted worldwide in over 60 countries, sometimes under the name of Early Management of Severe Trauma, especially outside North America. Its goal is to teach a simplified and standardized approach to
