This book focuses on the animal husbandry and nutrition based on significant evaluations by the authors of the chapters. Many chapters contain general overviews on animal husbandry and nutrition from different countries. Also, the sections created shed light on futuristic overlook with improvements for animal husbandry and feeding sector. Details about rearing and feeding different animal races are also covered herein. It is hoped that this book will serve as a source of knowledge and information on animal husbandry and nutrition sector.

The profitability of animal traction. The management of draft animals. Animal-powered tillage and weeding technology. The supply and distribution of implements for animal traction women and animal traction technology. The transfer of animal traction technology. Animal-powered transport. Diversifyng operations using animal power. Country experiences and constraints.

This new resource book provides a wealth of ideas and experiences concerning animal traction in many countries. This publication has been developed from the ATNESA workshop held in Kenya on 'meeting the challenges of animal traction' and draws together key papers and contributions from professionals in 27 different countries. The papers address a number of important challenges to animal traction that relate to participation, environment, gender, extension, transport, equipment and animal husbandry. In addition, several papers describe national-level challenges and project attempts to address these. It will be of great value to all those concerned with the development of animal power, tropical agricultural development and rural transport, especially those involved in participative research, training, extension, development, planning, gender issues and project implementation.

Stalwart and powerful, oxen are employed as working cattle all over the world. Stronger, steadier, less expensive, and easier to keep than draft horses, oxen can plow fields, haul stones, assist in logging, improve roads, and showcase traditional farming techniques. Oxen can help smallscale farmers keep costs down and productivity up without expensive machinery. Oxen is the definitive resource for selecting, training, feeding, and caring for the mighty ox. It shows you how to choose an ideal team, properly feed and house your oxen, train calves and mature cattle, fit a yoke and bows, address common challenges, and maintain a team's overall health. You'll also learn how to use oxen safely for a variety of farming and logging tasks and how to train a team for demonstrations and competitions.

Equine Applied and Clinical Nutrition is a comprehensive text resource on the nutrition and feeding management of horses. Over 20 experts from around the world share their wisdom on a topic of central relevance to all equine practitioners and the equine community generally. Both basic and applied (including healthy and diseased animals) nutrition and feeding management of horses and other equids (i.e. ponies, donkeys, wild equids) are covered. The book will appeal to a wide audienc: undergraduate and post-graduate students in equine science and veterinary medicine, veterinarians, equine nutritionists, horse trainers and owners. The clinical component will strengthen the appeal for equine veterinarians. Equine Applied and Clinical Nutrition will be a "must have" for anyone involved in the care of horses, ponies and other equids. The book is divided into 3 parts: Basic or core nutrition in this context refers to digestive physiology of the horse and the principles of nutrition. Applied nutrition deals with the particular types of foods, and how to maintain an optimum diet through various life stages of the horse. You might characterize this aspect as prevention of disease through diet. Clinical nutrition covers various diseases induced by poor diet, and their dietary treatment and management. It also looks at specific feeding regimes useful in cases disease not specifically induced by diet. Authoritative, international contributions Strong coverage of clinical aspects either omitted from or only sparsely dealt with elsewhere Full colour throughout The only clinical equine nutrition book

International guidelines and standards for the design, implementation and assessment of livestock interventions to assist people affected by humanitarian crises, LEGS expands the commitment in the Sphere handbook towards supporting livelihood assets, presenting clear and practical options for supporting livestock during and following disasters.
