Essential oils are use in this medicine to treat many diseases. In a review of the last five years it was found that several essential oils with anti-inflammatory activity were isolated from 43 plants. In some cases, oils of the same genus but different species have this activity, such as the essential oils obtained from three species of genus *Origanum*, as well as three oils from three species of the *Citrus* genus, and three from the *Pimpinella* genus.

Anti-inflammatory (or antiinflammatory) is the property of a substance or treatment that reduces inflammation or swelling. Anti-inflammatory drugs make up about half of analgesics, remedying pain by reducing inflammation as opposed to opioids, which affect the central nervous system to block pain signaling to the brain.
