Api Standard 671 Special Purpose Couplings For Petroleum
This standard covers the minimum requirements for centrifugal fans for use in petroleum, chemical, and gas industry services. Fan static pressure rise is limited to differential usually not exceeding 130 in. (330 cm) of water equivalent air pressure from a single impeller or each impeller in a two stage fan.

ification for "Special-Purpose Couplings For Refinery Service," API 671. But not much is said about general purpose couplings in API 610 titled, "Centrifugal Pumps for General Refinery Service" (Seventh Edition). This specification states that couplings must have a diameter concentric to the bore within 0.003 TIR to aid alignment. This standard also requires that couplings

GENERAL PURPOSE VS SPECIAL PURPOSE COUPLINGS

by Jon Mancuso

API RP 11PGT, First Edition, May 1, 1992, Paragraph 2.3.2 requires that couplings meet API 671. API 671, Section 2.6, refers to balance tests. There are two kinds of balance test methods, low speed balance and high speed balance. We understand that API 671 requires only a low speed balance and does not require a high speed balance. Is our understanding correct? 671-I-01/04
