Airplanes, the second generation of the original Boeing 737-100/-200. Development began in 1979 and the first variant, the 737-300, first flew in February 1984 and entered service in December of that year. The stretched 737-400 first flew in February 1988 and entered service later that year. The shortest variant, the ...

The Boeing 737 is a narrow-body aircraft produced by Boeing Commercial Airplanes at its Renton Factory in Washington. Developed to supplement the Boeing 727 on short and thin routes, the twinjet retains the 707 fuselage cross-section and nose with two underwing turbofans. Envisioned in 1964, the initial 737-100 made its first flight in April 1967

Series 3/5/6/700 pack output temperatures are independently controlled. Series 4/8/900 packs work to the coldest of the three zones, the two warmer zones are then heated by trim air after the mix manifold. In both series, flight-deck air is taken from before the mix manifold, however series 4/8/900 flight-deck air may also contain trim air.

Aviation Partners Boeing APB are offering retrofit kits to add winglets to any 737-300. Known as Special Performance (SP), the winglets give a 4.5% drag reduction over the standard model. The first 737-300SP was delivered 9 Jul 2003 and the retrofit kits are expected to be available for the -400 by the end of 2003. 737 Classics Key Dates:
