serialization, and rigging up MVC controllers and views. Historically, ASP.NET came with the .NET Framework—you could not separate the two.

1. ASP.NET Core Primer - Building Microservices with ASP ...

Building microservices with ASP.NET Core (without MVC) There are several reasons why it makes sense to build super-lightweight HTTP services (or, despite all the baggage the word brings, “microservices”). I do not need to go into all the operational or architectural benefits of such approach to system development, as it

...

Creating an ASP.NET Core Application Solution. Open the Visual Studio and add a new project. Choose the application as ASP.NET Core Web Application and give it a meaningful name. Next, choose API as the type of the project and make sure that "Enable Docker Support" option is selected with OS type as Linux. The solution will look as shown below.
