Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of Medicine (IOM) released the report *The Future of Nursing: Leading Change, Advancing Health*, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP *Future of Nursing: Campaign for Action* and others in implementing the recommendations from the 2010 report and identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.

The *Advanced Practice Registered Nurse as a Prescriber* is an authoritative reference guide designed for students and practicing APRNs alike—delivering the evidence-based information required for informed and ethical prescribing of medication in various clinical settings. Now in its second edition, this comprehensive book offers up-to-date coverage of all critical aspects of the prescriber role, including legal and regulatory responsibilities, managing difficult patient situations, assessing and addressing special considerations with controlled substances, and more. Drawing upon their clinical and

professional experience, this respected team of authors provide clear and straightforward information based on current research and reliable evidence, helping readers identify and avoid common prescribing mistakes and pitfalls whilst presenting specific strategies to respond appropriately to an array of typical clinical experiences. This revised edition includes new and expanded chapters with information on authorizing medical marijuana, prescription monitoring programs, electronic prescribing, pharmacogenetics in prescribing and patient response, and issues surrounding controlled substance prescribing and prescribing for opioid use disorder. This leading single-volume resource: Addresses the opportunities, challenges and responsibilities that APRNs face as prescribers Covers the laws, regulations, and professional issues that affect prescribing Discusses global approaches to registered nurse and APRN prescribing such as task sharing, formularies, and independent authority Guides APRNs through difficult clinical situations such as patients seeking controlled substances and requesting inappropriate care Navigates the multiple facets of prescribing controlled substances Examines the role of the APRN in states with medical marijuana laws Serves as a resource to engage in advocacy for fully autonomous prescribing The Advanced Practice Registered Nurse as a Prescriber is essential reading for APRN and pharmacotherapeutics students, registered nurses transitioning to the role of APRN prescriber, and all APRNs including Nurse Practitioners (NP), Clinical Nurse Specialists (CNS), and Certified Registered Nurse Anesthetists (CRNA).

Lehne's Pharmacotherapeutics for Advanced Practice Nurses and Physician Assistants, 2nd Edition builds on the same foundation of clearly explained, up-to-date, and clinically current content as the trusted Lehne undergraduate text, while focusing on the information that advanced practice nurses and Physician Assistants specifically need for safe and effective prescribing. Three introductory chapters

provide foundational content for new prescribers in the areas of prescriptive authority, rational drug selection, prescription writing, and promoting positive outcomes of drug therapy. Core drug chapters are focused on the drugs that prescribers will most commonly see in clinical practice. A sharp focus is also placed on pharmacotherapeutic decision-making, with Black Box Warnings and new bulleted Key Prescribing Considerations features. The second edition features completely new chapters on Genetic and Genomic Considerations, Muscarinic Antagonists and Immunomodulators, and updated content throughout. It's everything advanced practice nursing and Physician Assistant students need to be safe and effective prescribers! Introductory chapters tailored to the specific needs of prescribers cover topics such as prescriptive authority, rational drug selection and prescription writing, and promoting positive outcomes of drug therapy. Carefully focused pharmacotherapeutic content reflects the drugs most commonly seen and used by prescribers, with emphasis not on the first drug discovered or developed in each class but on the agents most often used today. Primary care drugs are addressed first in each chapter as appropriate, followed by acute care drugs. UNIQUE! Prescriber-focused pedagogical aids further reinforce the most important information for prescribers. Integrated coverage of Canadian trade names appears throughout the text and is highlighted with a familiar maple-leaf icon. Integrated coverage of interprofessional collaboration addresses the growing global interest in interprofessional collaboration and incorporates opportunities for interprofessional collaborative practice throughout.

The only pharmacology resource specifically written by and for nurse practitioners, this new edition provides a greater emphasis on prototype drugs while retaining its comprehensive approach to the pharmacology content needed by the primary care provider. New features include prototype drug lists in the coverage of drug classes that receive expanded coverage, detailed patient teaching guidelines,

expanded content in both the geriatric and pediatric chapters, a special icon identifying the Top 200 Drugs, and highlighted Clinical Alerts. Comprehensive coverage is provided of all drugs commonly prescribed and used in the primary care setting. Prototype drugs are presented first in each drug class, with expanded coverage of these agents. Clear explanations describe how each drug in a class differs from its prototype. Detailed information shows how to provide effective patient teaching, as well as how to gain patient compliance. Chapters focus on the practitioner's role in patient teaching, drug action, and drug therapy. Online Resources are provided at the end of each chapter. The Top 200 Drugs are described according to the number of U.S. prescriptions dispensed. Five new units improve the organization of material: Renal/Genitourinary Agents (Unit 8); Psychotropic Agents (Unit 11); Endocrine Agents (Unit 12); Female Reproductive Agents (Unit 13); and Health Promotion (Unit 15). New chapters examine over-the-counter medications, compliance and the therapeutic experiment, overview of the nervous system, substance abuse, treatment of common infections, weight management, and complementary and alternative treatments. Reorganized and redesigned format and headings are more consistent and easy to follow. Content has been expanded in the geriatric and pediatric "special populations" chapters (Ch. 6 and 7). More concise coverage of disease processes features clearer ties to the Mechanism of Action sections. 25 new figures have been added to the pathophysiology and Mechanisms of Action sections. A Table of Common Interactions is included on the inside of the back cover.

Written by and for nurse practitioners, this practical textbook focuses on what primary care providers need to learn and practice drug therapy. With an overall emphasis on patient teaching and health promotion, you will learn how to provide effective patient teaching about medications and how to gain patient compliance. Drug coverage focuses on “key drugs rather than “prototype drugs, so you can find important information about the most commonly used drugs rather than the first drug in each class. You will also find discussions on the legal and professional issues unique to nurse practitioners and other

primary care providers. The 3rd edition also features an expanded emphasis on established clinical practice guidelines and evidence-based practice, plus two new chapters that cover drugs for ADHD and drugs for dementia. **UNIQUE!** Written specifically for nurse practitioners with an overall emphasis on patient teaching and health promotion. **UNIQUE!** Covers specific topics such as prescriptive authority, role implementation, and writing prescriptions. Presents comprehensive coverage of the drugs most commonly prescribed in – and the issues most relevant to – primary care practice. **UNIQUE!** Identifies the Top 200 drugs in chapter openers with a special icon and covers them in-depth to familiarize you with the most important, need-to-know drug information. Uses a consistent heading scheme for each prototype drug discussion to make it easier to learn and understand key concepts. Includes an introductory chapter on “Design and Implementation of Patient Education that highlights content on patient teaching and compliance. Includes specific “Patient Education sections in each drug chapter. Provides extensive coverage of drug therapy for special populations to alert you to special considerations based on age, pregnancy, race and other factors. A separate chapter on “Complementary and Alternative Therapies discusses the available complementary and alternative modalities, including detailed information on actions, uses, and interactions of commonly used herbs. Drug Overview tables at the beginning of each chapter outline the classifications of drugs discussed and provide a handy reference of drug classes and subclasses, generic names, and trade names. Clinical Alerts highlight essential information that primary care providers must remember in order to avoid serious problems, including cautions for prescribing, information about drug interactions, or warnings about particularly ominous adverse effects. An entire unit covers drugs for health promotion to introduce you to drugs commonly seen in outpatient primary care settings and to prepare you for practice in a society increasingly focused on health promotion and disease prevention. Includes separate chapters on
