"What we have here is a bad case of stripes. One of the worst I've ever seen!" Camilla Cream loves lima beans, but she never eats them. Why? Because the other kids in her school don't like them. In much of the world, religious traditions are seriously valued but, in the context of religious plurality, this sets educationalists an enormous challenge. This book provides a way forward in exploring religious life whilst showing how bridges might be built between diverse religious traditions. Teaching Virtue puts engagement with religious life - and virtue ethics - at the heart of religious education, encouraging 'learning from' religion rather than 'learning about' religion. The authors focus on eight key virtues, examining these for what they can offer of religious value to pupils and teachers. Individual chapters put the discussion into context by offering a vision of what religious education in the future could look like; the need for responsible religious education; a historical review of moral education and an introduction to virtue ethics. Lesson plans and examples demonstrate how the virtues may be approached in the classroom, making it an invaluable guide for all involved in teaching religious education.

In elementary schools across the country, teachers are expected to provide at least five minutes of character education each day. This book makes it easy to meet that requirement in a meaningful way. It includes 180 character vignettes—five for each of the 36 weeks in the school year—grouped by trait. Each features kids in real-life situations making decisions that reflect their character. Each is short enough to be read aloud; all can be used as starting points for discussion, to support an existing character education program, or as the basis for an independent program. An excellent tool for the classroom or the character-conscious home.

This flexible resource combines character education with analogies to powerful stories from nature. The heart of each of the book’s twenty-five lessons is an engaging story, written to kids, describing a particular animal or plant and its distinctive qualities. Busy classroom teachers will like this book’s accessibility and flexibility. Kids can read a story individually or in groups, or follow along as the teacher reads it aloud. Accompanying each story, teachers will find several activities—most of them quick, easy, and requiring few supplies—that further investigate animals or plants and the connections between their qualities and human behaviors. Every lesson examines several main character traits, providing starting points and sample questions for discussing and exploring analogies between events in nature and human acts of character. Features include a chart cross-referencing lessons to specific character traits and a list of further resources. Digital content contains all of the book’s reproducible forms, including a color photo of each plant and animal, plus a complete bonus lesson.
