Diverticular Disease of the Colon: A Deficiency Disease of Western Civilization presents a study of colonic physiology and the symptoms of colonic diverticulosis and diverticulitis. The book also discusses the etiology and pathogenesis of the disease and its treatment by dietary means. The monograph is divided into 22 chapters, discussing a wide range of topics that provide greater insight into the diverticular disease of the colon. The book initially provides the definitions and etymology of words used, the history of the disease, and its detection and recognition. Several chapters are also devoted to the examination of the colon; the effect of certain drugs and stimuli to the colon; clinical manifestation and classification of the disease; treatment and prognosis; and the epidemiology and etiology of diverticulosis and its relationship to dietary fiber. This book will be of benefit to physicians, surgeons, epidemiologists, and medical students.

Bankruptcy prediction is one of the most important research areas in corporate finance. Bankruptcies are an indispensable element of the functioning of the market economy, and at the same time generate significant losses for stakeholders. Hence, this book was established to collect the results of research on the latest trends in predicting the bankruptcy of enterprises. It suggests models developed for different countries using both traditional and more advanced methods. Problems connected with predicting bankruptcy during periods of prosperity and recession, the selection of appropriate explanatory variables, as well as the dynamization of models are presented. The reliability of financial data and the validity of the audit are also referenced. Thus, I hope that this book will inspire you to undertake new research in the field of forecasting the risk of bankruptcy.

Your business reputation can take years to build—and mere minutes to destroy The range of business threats is evolving rapidly but your organization can thrive and gain a competitive advantage with your business vision for enterprise risk management. This volume is a monograph of the 47 species of the Dulcamaroid clade of the large and diverse genus Solanum. Species in the group occur in North, Central and South America, and in Europe and Asia. The group is most species-rich in Peru and Brazil, and three of the component species, Solanum laxum of Brazil, Solanum searforthianum of the Caribbean and and Solanum crispum of Chile are cultivated in many parts of the world. All species are illustrated and a distribution map of each is provided. All names are typified and nomenclatural and bibliographic details for all typifications presented. One new species from Ecuador is described. The monograph is the first complete taxonomic treatment of these species since the worldwide monograph of Solanum done by the French botanist Michel-Felix Dunal in 1852.
