Harvard Business Review recently called data science “ The Sexiest Job of the 21st Century. ” It ' s not just sexy: For millions of managers, analysts, and students who need to solve real business problems, it ' s indispensable. Unfortunately, there ' s been nothing easy about learning data science – until now. Getting Started with Data Science takes its inspiration from worldwide best-sellers like Freakonomics and Malcolm Gladwell ' s Outliers: It teaches through a powerful narrative packed with unforgettable stories. Murtaza Haider offers informative, jargon-free coverage of basic theory and technique, backed with plenty of vivid examples and hands-on practice opportunities. Everything ' s software and platform agnostic, so you

can learn data science whether you work with R, Stata, SPSS, or SAS. Best of all, Haider teaches a crucial skillset most data science books ignore: how to tell powerful stories using graphics and tables. Every chapter is built around real research challenges, so you ' ll always know why you ' re doing what you ' re doing. You ' ll master data science by answering fascinating questions, such as:

- Are religious individuals more or less likely to have extramarital affairs?
- Do attractive professors get better teaching evaluations?
- Does the higher price of cigarettes deter smoking?
- What determines housing prices more: lot size or the number of bedrooms?
- How do teenagers and older people differ in the way they use social media?
- Who is more likely to use online dating services?
- Why do some purchase iPhones and others Blackberry devices?
- Does the presence of children influence a family ' s spending on alcohol?

For each problem, you ' ll

walk through defining your question and the answers you ' ll need; exploring how others have approached similar challenges; selecting your data and methods; generating your statistics; organizing your report; and telling your story. Throughout, the focus is squarely on what matters most: transforming data into insights that are clear, accurate, and can be acted upon.
