Considering philosophical theories of punishment in light of both abstract arguments and factual evidence about the effects of punishing offenders, this book links the moral justification of punishment by the state to more general issues concerning the nature of moral disagreements and our obligations to obey the law. Ten applies his discussion to problems in the punishment of a variety of offenders--the dangerously mentally ill, Nazi war criminals, "negligent" drivers, rapists, and others--and considers several related questions about crime and punishment.

"The 8th edition of From Crime to Punishment provides the most comprehensive and up-to-date introduction to criminal law and criminal procedure now available in Canada. The authors have crafted a careful examination of the entire criminal process from the commission of a crime to conviction and sentencing, including an overview of the foundations of our present criminal law system. Originally written for the layperson and those interested or presently working within the legal and criminal justice systems, the present work covers diverse topics such as the basic principles of criminal law to how judges determine the credibility of witnesses in courtroom proceedings. This book simplifies what others have found to be complex and mystifying about our criminal law system, and therefore, is an excellent resource for those interested in understanding how it functions in the real world."--pub. desc.

'Crime and Punishment' is an 1866 novel by Russian author Fyodor Dostoevsky. The narrative concerns the inner anguish of Rodion Raskolnikov, a poor ex-student in Saint Petersburg who conceives a murderous plan to steal from a notorious pawnbroker. However, after the deed is done he deteriorates into a feverish state and begins to fret obsessively. In his delirium, Rodion wanders the streets of the city unknowingly drawing attention to himself and his connection to the crime. A masterpiece that places you into the confused mind of a misguided murderer, Dostoevsky's 'Crime and Punishment' is a classic of Russian literature not to be missed by any lover of fiction. Fyodor Mikhailovich Dostoevsky (1821 | 1881) was a Russian novelist, essayist, short story writer, journalist, and philosopher. His literature examines human psychology during the turbulent social, spiritual and political atmosphere of 19th-century Russia, and he is considered one of the greatest psychologists in world literature. A prolific writer, Dostoevsky produced 11 novels, three novellas, 17 short stories and numerous other works. Many vintage books such as this are increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

Punishment is an area of increasing importance and concern to both citizens and politicians. How do we decide what should be crimes? How do we decide when someone is responsible for a crime? What should we do with criminals? These are the main questions raised in this book.

Raskolnikov is an impoverished former student living in Saint Petersburg, Russia who feels compelled to rob and murder Alyona Ivanovna, an elderly pawn broker and money lender. After much deliberation the young man sneaks into her apartment and commits the murder. In the chaos of the crime Raskolnikov fails to steal anything of real value, the primary purpose of his actions to begin with. In the period that follows Raskolnikov is racked with guilt over the crime that he has committed and begins to worry excessively about being discovered. His guilt begins to manifest itself in physical ways. He falls into a feverish state and his actions grow increasingly strange almost as if he subconsciously wishes to be discovered. As suspicion begins to mount towards him, he is ultimately faced with the decision as to how he can atone for the heinous crime that he has committed, for it is only through this atonement that he may achieve some psychological relief. As is common with Dostoyevsky's work, the author brilliantly explores the psychology of his characters, providing the reader with a deeper understanding of the motivations and conflicts that are central to the human condition. First published in 1866, "Crime and Punishment" is one of Fyodor Dostoyevsky's most famous novels, and to this day is regarded as one of the true masterpieces of world literature. This edition is printed on premium acid-free paper, is translated by Constance Garnett, and includes an Introduction by Nathan B. Fagin.

"This volume brings together philosophers and literary scholars to explore the ways that Crime and Punishment engages with philosophical reflection. The seven essays treat a diversity of topics, including: self-knowledge and the nature of mind, emotions, agency, freedom, the family, the authority of law and morality, and the self"--

Foucault is one of those rare philosophers who has become a cult figure. Born in 1926 in France, over the course of his life he dabbled in drugs, politics, and the Paris SM scene, all whilst striving to understand the deep concepts of identity, knowledge, and power. From aesthetics to the penal system; from madness and civilisation to avant-garde literature, Foucault was happy to reject old models of thinking and replace them with versions that are still widely debated today. A major influence on Queer Theory and gender studies (he was openly gay and died of an AIDS-related illness in 1984), he also wrote on architecture, history, law, medicine, literature, politics and of course philosophy, and even managed a best-seller in France on a book dedicated to the history of systems of thought. Because of the complexity of his arguments, people trying to come to terms with his work have desperately sought introductory material that makes his theories clear and accessible for the beginner. Ideally suited for the Very Short Introductions series, Gary Gutting presents a comprehensive but non-systematic treatment of some highlights of Foucault's life and thought. Beginning with a brief biography to set the social and political stage, he then tackles Foucault's thoughts on literature, in particular the avant-garde scene; his philosophical and historical work; his treatment of knowledge and power in modern society; and his thoughts on sexuality. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
