The Eighth Edition of this bestselling introductory text features a comprehensive, updated survey of all key business functions: management, marketing, accounting, finance, and information technology. Core topics highlighted within these functional areas include ethics and social responsibility, small business concerns, different forms of business ownership, and international business concepts. In light of current business conditions, this edition also addresses the nation's economic problems, corporate credibility and efforts to improve accounting standards, the dot-com meltdown, entrepreneurial businesses, diversity, globalization, e-business, and other timely issues. Likewise, the authors have integrated more information on employment trends to help students choose a career and compete in a fickle job market. Updated and enhanced coverage of e-Business--in boxed features, examples, illustrations, and discussions throughout the text--reflects this sector's growing importance. In addition, Navigating the World of E-Business (Chapter 4) has been completely revamped to cover key concepts, as well as the strategies and challenges facing current businesses. Pedagogical tools have also been revised, including all new Inside Business cases at the beginning of each chapter and closing Return to Inside Business features.
