A wide variety of forecasting methods are available to management (see, for example, Makridakis and Wheelwright, 1989). These range from the most na methods, such as use of the most recent obve servation as a forecast, to highly complex approaches such as neural nets and econometric systems of simultaneous equations.

Makridakis, Wheelwright & Hyndman - Forecasting, Methods ...  
As forecasting methods are used in various applications, the computational time required to forecast becomes critical. It would be impractical for example to utilize the ML GRNN method (the most computationally demanding) to predict the demand for hundreds of thousands of inventory items, even though computers are becoming faster and cheaper.
