ment of the euclidean geometry is clearly shown; for example, it is shown that the whole of the euclidean geometry may be developed without the use of the axiom of continuity; the significance of Desargues's theorem, as a condition that a given plane geometry may be regarded as a part of a geometry of space, is made apparent, etc. 5.

The Foundations of Geometry

A plane is a perfectly flat surface extending in all directions. It can be thought of as the ceiling of a room, only extended into all directions infinitely. A plane has two dimensions: length and width. All planes are flat surfaces. If a surface is not flat, it is called a curved surface. The tool plane can be used to create a flat, level surface like the mathematical plane—hence the name. In geometry, a plane is made up of an infinite number of lines. It has no depth. It is absolutely ...
