always been talking to ISS astronauts on FM simplex (145.800) — but those can be rare chance encounters. Ham radio operators have also enjoyed slow-scan television (SSTV) broadcasts and APRS packet radio via the ISS digipeater.

## New Ham Radio Onboard The ISS Is On The Air - K0LWC

Within the United States, Ham radio operators can use 26 different “bands” or groups of frequencies with their radios. According to the National Association for Amateur Radio, this includes everything above 1.8 Megahertz to 275 Gigahertz. This is a pretty wide range that technically covers HF, VHF, UHF, SHF, and EHF frequencies.

ISS Reference - Ham Radio - NASA  
Amateur Radio (ham radio) is a  
popular hobby and service that brings  
people, electronics and  
communication together. People use  
ham radio to talk across town, around  
the world, or even into space, all  
without the Internet or cell phones. It's  
fun, social, educational, and can be a  
lifeline during times of need.

## Amateur Ham Radio - The Ultimate Tool for Survival ...

Ham radio frequencies are somewhere between these two extremes. If you've ever taken a look at a piece of ham radio gear, then you might see a cryptic number like 146.520 MHz on the display screen. This is called a frequency. It measures how fast the radio's signals are vibrating in terms of a measurement called megahertz.
