year, which if fully implemented, could save the NHS an estimated £9bn a year.

Nurse specialists take initiative to show their value to ...

Previous studies suggest that losing the ability to control body function and being fearful of leaks, smell and noise lead some people to become apprehensive about being in public and therefore avoid social events altogether.^{16 34 39} Research about people ' s experiences of living with a stoma has highlighted the importance of people learning to use appliances to avoid leakage,^{31 34} and several studies about stoma formation stretching as far back as 1952 have highlighted a feeling of loss of ...

Experiences of support garments following bowel stoma ...

Recent systematic reviews suggest that a stoma has a negative impact on quality of life (QOL) [3–5], and patients with a stoma report difficulties in work and social situations, with sexuality and body image, and with stoma function [6, 7]. In addition, complications are common and can exacerbate quality of life issues . Interventions are therefore needed that have the potential to both reduce the risk of complication, and improve QOL for this group of patients.
