Coding Made Easy: HTML & CSS For Beginners | Udemy

If we put these three definitions together, we could say that HTML is “a programming language that uses unique code which allows you to display linked documents in a browser”. Why Should You Learn HTML? These days, website builders such as Wix and SiteBuilder have made building websites easy. With a simple drag and drop interface and a variety of templates, anyone can build a website that is both functional and stylish.

HTML for Beginners - Includes Tags for HTML5 - The Blog ...

However, you don't need knowledge of complex web programming languages to tailor a website to meet your needs and look professional while doing it. HTML provides the basic tools for designing a simple, professional website, and it can easily be self taught. HTML (HyperText Markup Language) is a web programming language designed to create web documents or web pages. Based upon SGML (Standard Generalized Markup Language), HTML's basic concept involves the use of "tags".

HTML Made Simple - CodeProject

A website building tool does not require any knowledge of programming, with its in-build drag-and-drop features and WYSIWYG editor you can create a professional website in couple of minutes. With HostGator, you can build a professional website without the need of using any programming. The website builder available at HostGator, offers you a wider range of modern templates that are suitable for different categories.

How to Make a Professional HTML / CSS Website?

Let's look at some of the basic features of HTML. HTML is made up of tags. Tags are special text that you use to mark up, or distinguish, parts of your web page. Hence the hypertext “markup” language. These tags tell the browser to display whatever is inside the tag in a specific way. Here's one example of a tag in action:
