Fundamentals of Human Resource Management 1/e, is the first human resource management text that is built from the ground up to address the new guidelines set forth by the Society for Human Resource Management (SHRM). The book has a modular approach, with an emphasis on integrating HR Content, Personal Competencies, and relevant Business Applications.

Fundamentals of Human Resource Management, by Noe, Hollenbeck, Gerhart and Wright is specifically written to provide a complete introduction to human resource management. While it doesn't cover the depths of human resource management theory, the book is rich with examples and engages students through application. Fundamentals differs from the hardback textbook by the same author team. Instead of a higher level of theory that's geared towards the HRM majors, this book focuses on the uses of human resources for the general business manager. Issues such as strategy are reduced to give a greater focus

on how human resources management is used in the everyday work environment. It provides students with the background necessary to manage human resources effectively and to be able to distinguish good from poor human resource management practices and how they impact business. Instructors are provided with a robust ancillary package that includes a comprehensive instructor's manual, test bank, PowerPoint presentation and a complete Online Learning Center to make course preparation easy.

Management of Human Resources focuses on student learning and self-study, and introduces the evolving role and accountabilities of HR professionals as strategic business partners at the boardroom table. Appropriate for both future HR Professionals and future line managers, it references the RPCs that are necessary for certification while balancing this with the line manager's perspective, showing the importance of HRM in daily interactions and in achieving corporate objectives Note: If you are purchasing an electronic version, MyHRLab does not come automatically packaged with it.
