Invalid teenager Leroy Wiley Gresham left a seven-volume diary spanning the years of secession and the Civil War (1860-1865). He was just 12 when he began and he died at 17, just weeks after the war ended. His remarkable account, recently published as *The War Outside My Window: The Civil War Diary of LeRoy Wiley Gresham, 1860-1865*, edited by Janet E. Croon (2018), spans the gamut of life events that were of interest to a precocious and well-educated Southern teenager—including military, political, religious, social, and literary matters of the day. This alone ranks it as an important contribution to our understanding of life and times in the Old South. But it is much more than that. Chronic disease and suffering stalk the young writer, who is never told he is dying until just before his death. Dr. Rasbach, a graduate of Johns Hopkins medical school and a practicing general surgeon with more than three decades of experience, was tasked with solving the mystery of LeRoy's disease. Like a detective, Dr. Rasbach peels back the layers of mystery by carefully examining the medical-related entries. What were LeRoy's symptoms? What medicines did doctors prescribe for him? What course did the disease take, month after month, year after year? The author ably explores these and other issues in *I Am Perhaps Dying* to conclude that the agent responsible for LeRoy's suffering and demise turns out to be *Mycobacterium tuberculosis*, a tiny but lethal adversary of humanity

since the beginning of recorded time. In the second half of the nineteenth century, tuberculosis was the deadliest disease in the world, accounting for one-third of all deaths. Even today, a quarter of the world's population is infected with TB, and the disease remains one of the top ten causes of death, claiming 1.7 million lives annually, mostly in poor and underdeveloped countries. While the young man was detailing the decline and fall of the Old South, he was also chronicling his own horrific demise from spinal TB. These five years of detailed entries make LeRoy's diary an exceedingly rare (and perhaps unique) account from a nineteenth century TB patient. LeRoy's diary offers an inside look at a fateful journey that robbed an energetic and likeable young man of his youth and life. *I Am Perhaps Dying* adds considerably to the medical literature by increasing our understanding of how tuberculosis attacked a young body over time, how it was treated in the middle nineteenth century, and the effectiveness of those treatments.

This final 1998 volume of the Cambridge Biography of D. H. Lawrence chronicles his progress from leaving Europe in 1922 to his death in Venice in 1930. He is revealed as a man both more complex and more humorous than is usually allowed, and exemplary in his resolute grappling with the central problems of his age.

LeRoy Wiley Gresham was born in 1847 to an affluent slave-holding family in Macon, Georgia. After a horrific leg injury left him an invalid, the educated, inquisitive, perceptive, and exceptionally witty 12-year-old began keeping a diary in 1860--just as secession and the Civil War began tearing the country and his world apart. He continued to write even as his health deteriorated until both the war and his life ended in 1865. His unique manuscript of the demise of the Old South—lauded by the Library of Congress as one of its premier holdings—is published here for the first time in *The War Outside My Window: The Civil War Diary of LeRoy Wiley Gresham, 1860-1865*. LeRoy read books, devoured newspapers and magazines, listened to gossip, and discussed and debated important social and military issues with his parents and others. He wrote daily for five years, putting pen to paper with a vim and tongue-in-cheek vigor that impresses even now, more than 150 years later. His practical, philosophical, and occasionally Twain-like hilarious observations cover politics and the secession movement, the long and increasingly destructive Civil War, family pets, a wide variety of hobbies and interests, and what life was like at the center of a socially prominent wealthy family in the important Confederate manufacturing center of Macon. The young scribe often voiced concern about the family's pair of plantations outside town, and recorded his

interactions and relationships with “servants”

Howard, Allen, Eveline, and others as he pondered the fate of human bondage and his family’s declining fortunes. Unbeknownst to LeRoy, he was chronicling his own slow and painful descent toward death in tandem with the demise of the Southern Confederacy. He recorded—often in horrific detail—an increasingly painful and debilitating disease that robbed him of his childhood. The teenager’s declining health is a consistent thread coursing through his fascinating journals. “I feel more discouraged [and] less hopeful about getting well than I ever did before,” he wrote on March 17, 1863. “I am weaker and more helpless than I ever was.” Morphine and a score of other “remedies” did little to ease his suffering. Abscesses developed; nagging coughs and pain consumed him. Alternating between bouts of euphoria and despondency, he often wrote, “Saw off my leg.” *The War Outside My Window*, edited and annotated by Janet Croon with helpful footnotes and a detailed family biographical chart, captures the spirit and the character of a young privileged white teenager witnessing the demise of his world even as his own body slowly failed him. Just as Anne Frank has come down to us as the adolescent voice of World War II, LeRoy Gresham will now be remembered as the young voice of the Civil War South.

a famed Mayfair gallery, the controversial artist Nick Bassington-Hope falls to his death. The police rule it an accident, but Nick's twin sister, Georgina, a wartime journalist and a infamous figure in her own right, isn't convinced. When the authorities refuse to consider her theory that Nick was murdered, Georgina seeks out a fellow graduate from Girton College, Maisie Dobbs, psychologist and investigator, for help. Nick was a veteran of World War I, and before long the case leads Maisie to the desolate beaches of Dungeness in Kent, and into the sinister underbelly of the city's art world. In *Messenger of Truth*, Maisie once again uncovers the perilous legacy of the Great War in a society struggling to recollect itself. But to solve the mystery of Nick's death, Maisie will have to keep her head as the forces behind the artist's fall come out of the shadows to silence her. Following on the bestselling *Pardonable Lies*, Jacqueline Winspear delivers another vivid, thrilling, and utterly unique episode in the life of Maisie Dobbs.

Love in *Dying* tells the story of Sarah, who is dying of cancer. It invites the notion that in any life, with the unflinching power of unconditional love inherent in friendship, the ordinary has the potential to unfold the mystery of the individual extraordinary goal we are each invited to reach. Life provides the opportunities; it is for us to recognize and embrace them. The pathway to wisdom is a journey into self-knowledge. By its nature it can be a lonely journey. We have to discover courage that acknowledges weaknesses and learn to take responsibility for mistakes and misunderstandings. Sarah's journey is coming to a close, and she recollects her life with clarity as she
