BEIJING, Feb. 1 (Xinhua) -- China imported more cars in 2017, the China Automobile Dealers Association (CADA) announced on Thursday. About 1.21 million automobiles were imported, 16.8 percent growth from 2016, the association said. Some 904,000 cars were bought from dealers, up 0.6 percent, reversing the decline seen in 2015 and 2016.

In 2016, the Chinese government decided to limit the cross-border flow of goods by raising customs fees and import taxes. This not only hurt Chinese shoppers, but it also went against China's pledge it made when it joined the World Trade Organization (WTO) to reduce its high tariffs so that Chinese people could afford imported goods.

This report aims to deepen understanding of trends and developments in trade, investment and regional integration in the Asia-Pacific region; emerging issues in trade, investment and trade facilitation policies, and impacts of these policies on countries' abilities to meet the challenges of achieving inclusive and sustainable development. It offers innovative policy options to meet the challenges of achieving sustainable trade and investment. It contains separate country and subregional country briefs. Part I delves into recent trends and developments pertaining to trade in merchandise and commercial services, and foreign direct investment (FDI) flows. Part II analyses how trade and investment are interlinked and can be channeled into sustainable development.

Fibre2Fashion magazine—the print venture of Fibre2Fashion.com since 2011—is circulated among a carefully-chosen target audience globally, and reaches the desks of top management and decision-makers in the textiles, apparel and fashion industry. As one of India's leading industry magazines for the entire textile value chain, Fibre2Fashion Magazine takes the reader beyond the mundane headlines, and analyses issues in-depth.

Since 1984, the FAO GLOBEFISH project (through a project unit established within the Fishery and Aquaculture Department of FAO [www.fao.org/in-action/globefish](http://www.fao.org/in-action/globefish)) has been providing Governments, national and international stakeholders with relevant data, information and knowledge on fish trade in order to assist them in designing and implementing efficient and inclusive market and trade strategies. These strategies contribute to the sustainable development of the fish trade sector (including the economic, social and environmental aspects) and, at the same time, contribute to improving food and nutrition security and strengthening livelihood opportunities and are directly linked to SO4. The publication contains a detailed quarterly update on market trends for a variety of major commodities. Combining the price information collected for the European Price Report with other market survey data collected by FAO GLOBEFISH, the report provides a detailed update on market trends for a variety of major commodities. Key market data is presented in a time series tabular or graphical form with a written analysis of trends and key events and news affecting commodities such as tuna, groundfish, small pelagics, shrimp, salmon, fishmeal and fish oil, cephalopods, bivalves and crustacea.

The paper models international spillovers from a hypothetical drop of China's imports as a result of China's rebalancing of its growth model. A network-based model used in the paper allows capturing higher round network effects of the shock, which are largely unaccounted for in the existing literature. Such effects include direct spillovers from China on its trading partners, subsequent spillins among them, and spillbacks on China itself. The paper finds that the network effects most likely will be substantial, may amplify initial shock, and change the direction of its propagation. The impact on Asia and Pacific will be the strongest followed by the Middle East and Central Asia. The impact on sub-Saharan Africa would be noticeable only for some countries. Spillovers on Europe, including the Euro area, will be moderate, and spillovers on the Western Hemisphere, including the United States, would be very marginal. Metal and non-fuel commodity exporters may experience the largest negative impact.

It is beyond dispute that both China and the European Union stand to gain from promoting low-carbon development through the dissemination of clean and renewable energy sources, as this inevitably leads to increased environmental protection. The depletion of fossil fuel resources and the accompanying changes in the global energy mix make Europe and China not only competitors in the global economic race, but also nolens volens partners. Their pragmatic partnership is characterized, on the one hand, by the need to take action to reduce the consumption of fossil fuels and, on the other, by the desire to minimize the negative environmental impact of their use. Hence, the existing and emerging cooperation between the two actors, while challenging for a

number of reasons, is not only an attempt to set up channels to exchange vital information, but also an exercise in setting the standards under which further cooperation will be forged.

This book examines Sino-African relations with a focus on China's active role in fostering economic and infrastructural development in Africa. It discusses the neo-colonialist implications of this relationship and the consequences for both sides.

Achieving the UN Sustainable Development Goals by 2030 will, to a great degree, depend on implementing a "circular economy". In the forest sector, this relates to how we manage forests and use forest products. The Forest Products Annual Market Review covers recent trends, policies and market intelligence on forest products along with production, consumption and trade statistics for the UNECE region; all of which are critical to the role of forests in creating a more circular economy.

Bringing together a collection of interdisciplinary chapters on China's Belt and Road Initiative (BRI), this book offers a comprehensive overview of the topic from a business and management perspective. With a focus on the China Pakistan Economic Corridor (CPEC), Volume II provides theoretical and empirical analyses of the opportunities and challenges facing businesses. With contributions covering economics, agriculture, energy, value chain, ethics, governance, and security, this collection is a useful tool for academics as well as policy-makers and practitioners in China, Pakistan, and other countries along the new Silk Road.

This book comprehensively and systematically introduces the principles, key technologies and main types of new energy utilization based on the analysis and prospect of global energy development trend and energy transformation law. Starting from the basic law of energy development, this book points out the inevitability of the development of fossil energy to non-fossil new energy, expounds scientifically and prospectively the importance of developing new energy to conform to the law of energy development and to ensure national energy security, introduces in detail various new energy technologies, summarizes the new strategies of traditional energy companies, and expounds respectively current situation and application prospect. The book is divided into four parts. The first one is "Energy Trend" includes the law of energy development, world energy layout and energy development trend. The second part, "New Energy Revolution", includes revolutionary energy technology and energy Internet technology. The third part is "New Strategies of Traditional Energy Companies", which includes the new energy distribution of oil companies and coal-fired power companies. Part IV "New Energy Theories", includes hydrogen energy, energy storage and new materials, geothermal, nuclear energy, wind and tide and other new energy sources.
