2011 Updated Reprint. Updated Annually. Middle East and Arabic Countries Free Trade & Economic Zones Law and Regulations Handbook

This is the first book-length empirical study of free zones (FZs) in Gulf Cooperation Council (GCC) countries. The volume systematically illustrates the development processes behind FZs in Gulf Arab states and assesses the impact of these commercial entities on regional integration, global trade and investment trends, and the Gulfs foreign relations. FZ development is an understudied question in the wider literature on the Gulf in this context, the theoretical implications and empirical findings of the work constitute a valuable addition to prevailing political economy debates concerning the region. The work maps how economic strategies unfold in the presence of available material resources on a local level while also demonstrating the ways in which they are shaped by the relationship of Gulf Arab states to regional and global accumulation circuits. Dr. Robert Mogielnicki is a Resident Scholar at the Arab Gulf States Institute in Washington DC, USA. .

Summarizes the education and labor market initiatives implemented or under way in four countries in the Arab region--Lebanon, Oman, Qatar, and the United Arab Emirates--to address the human resource issues they each face as they prepare their countries for a place in the 21st century global economy. Together, these countries highlight the variety of challenges faced by countries in the region and responses to those challenges.

UAE Customs, Trade Regulations and Procedures Handbook

"This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets.Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world."

Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,

Annotation * Unique guide to one of the Middle East's main business and financial centres * Assessment of investment opportunities in the seven Emirates * Up-to-date guide to the regulatory and tax regime and the rules of business engagement * Profiles of the UAE's industry sectors and some of its most dynamic companies * Written by professionals with on-the-ground experience * Of interest to professional investors, international companies, analysts, consultants, law firms, banks, accountants, and business academics "Doing Business with the United Arab Emirates" is the definitive English language guide to investment potential, commercial opportunity and business practice in the seven Emirates. The fact that the UAE played host to the recent annual meeting of the Board of Governors of the World Bank and the International Monetary Fund, confirmed that the world's leading financial and business authorities clearly see the crucial importance of the UAE as a global business center. Despite the recent invasion ofIraq, international investment flows are still being encouraged into the region -- something that "Doing Business with the UAE" aims to promote concretely. The book also highlights that the UAE has now developed a highly sophisticated, forward looking economy and a society seeking to capitalize upon the unique assets at its command. With its progressive business environment, an increasingly diversified economy, modern infrastructure and sound legal system, the UAE is asserting itself as the primary location for business in the highly competitive Arab Gulf region.
