Loris Malaguzzi is best known for his instrumental role in the creation and development of the Reggio Emilia approach — the child-centered early educational philosophy that hinges on the belief that children are powerful and capable individuals, with the ability and desire to construct their own knowledge.

Who is Loris Malaguzzi? The Compass School
The aim of the Reggio approach is to teach children how to use these symbolic languages (e.g. painting, sculpting, drama) in everyday life. This approach was developed after World War II by pedagogist Loris Malaguzzi and parents in the villages around Reggio Emilia, Italy. The name of the approach therefore derives its name from the city.

Reggio Emilia approach - Wikipedia
The Loris Malaguzzi International Centre is a place of encounter and exchange for those who intend to innovate education and culture — in Reggio Emilia, in Italy and in the world. It is a space open to every age, to ideas, to diverse cultures; a space that - starting from experience in the city ’ s municipal infant-toddler centres and preschools — produces research, experimentation and innovation on the content and processes of education for 0-99 year olds.

Loris Malaguzzi was one of the most important figures in 20th century early childhood education, achieving world-wide recognition for his educational ideas and his role in the creation of municipal schools for young children in the Italian city of Reggio Emilia, the most successful example ever of progressive, democratic and public education. Despite Malaguzzi ’ s reputation, very little of what he wrote or said about early childhood education has been available in English. This book helps fill the gap, presenting for the first time in English, writings and speeches spanning 1945 to 1993, selected by a group of his colleagues from an archive established in Reggio Emilia. They range from short poems, letters and newspaper articles to extended pieces about Malaguzzi ’ s early life, the origins of the municipal schools and his ideas about children, pedagogy and schools. This material is organised into five chronological chapters, starting at the end of World War Two and ending just before his death, with introductions to each chapter providing background, including the historical context, the main events in Malaguzzi ’ s life and the rationale for the selection of documents. The book provides a unique insight into the background, thinking and work of Malaguzzi, revealing, in his own words, how his thinking developed, how he moved between theory and practice, how he border-crossed many disciplines and subjects, and how he combined many roles ranging from administrator and campaigner to researcher and pedagogue. Academics, students and practitioners alike will find this landmark publication provides rich insights into his life and work.

The Municipal preschools of Reggio Emilia, in Northern Italy, are renowned world-wide for the excellence of their provision. This approach provides a unique collaboration between children, parents, teachers and the wider community. Loris Malaguzzi and the Reggio Emilia Experience brings together the history and context of the Reggio Emilia experience, and explores the principles espoused by Loris Malaguzzi and the Early Years' Educators of the Reggio Emilia Municipality. It critically evaluates the emergent curriculum and quality provision and offers new insights into the powerful and dominant discourses of the Reggio movement. It will provide students and educators with a comprehensive overview of the phenomenon that is Reggio Emilia.

This striking example of Malaguzzi’s work and philosophy-in-practice has not previously been available to the scholarly community or to the public interested in the history of the Reggio Emilia educational experience. Its round-table discussions and dialogues reveal valuable insights into the ways young children can be encouraged towards cooperative learning experiences, with implications far beyond the particular curriculum at hand. The editors' commitment to progressive education and to the rights and potential of all children worldwide has led them to share this rich record of the experience, so that current readers and those yet to come can glimpse the brilliant minds at work during this era (1990), and as it were, "listen in" on the fascinating discussions that were held on the topic of "cooperation."

"Loris Malaguzzi (1920 - 1994) was the pioneer of the Reggio Emilia approach to teaching young children. An ever-increasing number of teachers and educationalists from all over the world now come to study the Reggio pre-school’s unique methods, and this is largely due to Malaguzzi’s devotion, work and commitment over 45 years, and the small group of teachers and educators he trained and with whom he developed his methods. The principles that underpin the Reggio Emilia approach are fundamental to the way in which Early Childhood Education is being shaped around the world today. The work of Loris Malaguzzi was rooted in a strong sociocultural framework, meaning it was a considered response to what was needed for particular communities and their needs. Sandra Smidt here considers the life of this remarkable man, and through a pedagogical perspective explores his approach on topics including: - Relationships; - Observation; - Creativity; - Questioning; - Justice; - Equality; - Politics. Accessible and informative, this introductory yet in-depth look at Malaguzzi’s life and work will be of huge benefit to anyone working with young children in an educational capacity, including parents, and will be essential reading for students on early childhood education courses"--

The city-run early childhood program of Reggio Emilia, Italy, has become recognized and acclaimed as one of the best systems of education in the world. Over the past 30 years, educators there have evolved an innovative approach that fosters children’s intellectual development through a systematic focus on symbolic representation. Young children are encouraged to explore their environment and express themselves through many "languages", or modes of expression, including words, movement, drawing, painting, sculpture, shadow play, collage and music.... This book brings together the reflections of the Italian educators who founded and developed the system, as well as North Americans who have observed and/or studied there. It is a comprehensive introduction covering history and philosophy, curriculum and methods of teaching, school and system organization, the use of space and physical environments, and adult professional roles. -Back cover.

The early childhood programme of Reggio Emilia in Italy is acclaimed as one of the best education systems in the world and this book offers the unique insight of Carlina Rinaldi, the former director of the municipal early childhood centres in Reggio Emilia and successor to Loris Malaguzzi, one of the twentieth century’s leading pedagogical thinkers. Rinaldi has an enviable international reputation for her contribution to the Reggio approach and has given talks on the topic around the world. A collection of Rinaldi’s most important works, this book is organized thematically with a full introduction contextualising each piece. It closes with an interview by series editors Peter Moss and Gunilla Dahlberg, looking at Rinaldi’s current work and reflections on Reggio’s past, present and future. Much of this material is previously unpublished and focuses on a number of questions: What were the ideas and legacy of Loris Malaguzzi? What is unique about Reggio Emilia? What are the issues in education today and what does it mean to be a teacher? How can educators most effectively make use of creativity?

When the first year of preschool starts, all the protagonists: children, families, and school staff, each in his or her own way, know that an important story is about to begin. It is a truly special time: expectations are expressed, shared meanings are progressively constructed, and procedures are put into place for building an experience together that everyone hopes will be rich, happy, and special. Advisories is a visit to the Diana School from a particular point of view: that of the six-year-old children who are leaving the preschool to go to elementary school. Knowing their school will welcome new three-year-olds, the older children have taken on the journalistic task of explaining things and advising the new arrivals. Twenty-five chroniclers have engaged in trying to connect their own memories and what they consider to be important with the possible interests and questions of twenty-five three-year-old children they don’t know. The result is an image that recreates the school by way of a strongly interpreted story of places and people. More than describing, it transforms the spaces, times, people, and events of the school into small and big adventures of life.

"This large exhibition ... recounts the development and innovative energy of Reggio Emilia’s educational work. Five sections present some of the latest projects in Reggio Emilia’s infant-toddler centres and preschools, offering a broad, interdisciplinary kaleidoscope spanning various 'languages' and media." -- back cover.
