~~Motion Guide Macromedia Flash — gardemypet.com~~

A motion guide is an special layer that sets a trajectory for the symbols of the affected layer, so that these symbols follow it, during its motion. This layer is invisible during the reproduction and allows one to draw any type of vector drawing, that will allow us to create not necessarily a rectilinear movement.

In one movie, a motion tween is created that follows a guide layer. This movie is then exported as an SWF and imported into the second movie. In the second movie, the layer that contains the imported SWF is set to be a mask layer. Finally, the object to be masked is placed in a masked layer under the imported tween.
