## RV Quick Tips (CC) ~~Manual Air Conditioning~~

Manual and automatic air conditioners are used to cool homes, businesses and vehicles. Manual and automatic systems primarily cool one room or zone in a home or building, or for a small space, such as a vehicle. These units do not require a "whole home" HVAC duct work system to operate. Only central air conditioning systems require duct work.

manually controlled air conditioning installation, ie the famous 3-wheel panel and a small button on which the snowflake is drawn, the cold air in the passenger compartment comes after it is pulled from the outside and ...

## ~~Manual air conditioning vs climate control~~

If your car is equipped with a manual air conditioning system, it provides you with the means to keep the interior temperature at the right level for you and your passengers with relative ease. Here's how to use the various controls: Turn the temperature knob to set the desired temperature. Note that if you don't have the AC button pushed in, the system will only blow ambient temperature air, or heated air (depending on the temperature selected).
