LECTURE NOTES FOR AN
INTRODUCTORY COURSE ON THE
LANGLANDS PROGRAM 5 The
Plancherel theorem is a
major result of abstract
Fourier theory. For us its
relevance lies in the fact
that it offers a different
description of the space
 $L^2(A)$ as an A -
representation.

meaning in the Cambridge English ...

This course is aimed at those new to programming and provides an introduction to programming using Python. This course is probably unsuitable for those with programming experience, even if it is just in shell scripting or Matlab-like programs. Such individuals should try the "Python: Introduction for Programmers" course instead. By the end of this course, attendees should be able to write simple Python programs and to understand more complex Python programs written by others.

Python: Introduction for Absolute Beginners – IT Help and ...

NOTES. This unit provides a brief introduction to computer hardware and software. We have included this unit to help those who are teaching students with no computer background.

However, any introductory course in the use of micro-computers is likely to have covered this material already. Binary notation is introduced here.

UNIT 3 - INTRODUCTION TO COMPUTERS

This course companion to the 'Introduction to Philosophy' course was written by the

when it was repeated at the
Perimeter Institute.

Individual sections can be
downloaded below.

David Tong: Quantum Field Theory

These lectures are designed
to give students a gentle
introduction to applied
mathematics in their first
term at Oxford, allowing
time for both students and
tutors to work on developing
and polishing the skills
necessary for the course. It
will have an 'A-level' feel
to it, helping in the
transition from school to
university.
