Pharmako/Poeia. Plant Powers, Poisons and Herbcraft. Dale Pendell. A book review by Gyrus / Posted 17 May 2008. What makes a good map? How should it be formed to guide us through strange terrain? Naturally, it should be abbreviated, compacted, abstracted to a certain degree; a map as big as the land it describes is useless. Crucially, its shape ...

In an updated encyclopedic study of the history and uses of psychoactive plants and related substances, the author offers a blend of authority and playfulness and includes a new introduction to each resource.

"Pharmako poeia: plant powers, poisons, and herbcraft focuses on familiar psychoactive plant-derived substances and related synthetics, ranging from the licit (tobacco, alcohol) to the illicit (cannabis, opium) and the exotic (absinthe, salvia divinorum, nitrous oxide)"--Provided by publisher.

Discusses the effects of plants on humans, and looks at plants connected with death, drunkenness, euphoria, peacefulness, sensuality, and other mental states

"Pharmako gnosis: plant teachers and the poison path focuses on plant-based and derivative psychedelic "teachers" (including ayahuasca, peyote, LSD, and DMT) and on the "poison path" of substances such as belladonna, ketamine, and ibogaine"--Provided by publisher.

"Pharmako dynamis: stimulating plants, potions, and herbcraft focuses on stimulants (including coffee, tea, chocolate, and coca and its derivatives) and empathsogens (notably Ecstasy)"--Provided by publisher.

\*\*\*This paperback edition has a new introduction by the author and updated content. This is the first volume of North Atlantic Books' updated paperback edition of Dale Pendell's Pharmako trilogy, an encyclopedic study of the history and uses of psychoactive plants and related synthetics first published between 1995 and 2005. The books form an interrelated suite of works that provide the reader with a unique,

reliable, and often personal immersion in this medically, culturally, and spiritually fascinating subject. All three books are beautifully designed and illustrated, and are written with unparalleled authority, erudition, playfulness, and range. Pharmako/Poeia: Plant Powers, Poisons, and Herbcraft includes a new introduction by the author and as in previous editions focuses on familiar psychoactive plant-derived substances and related synthetics, ranging from the licit (tobacco, alcohol) to the illicit (cannabis, opium) and the exotic (absinthe, salvia divinorum, nitrous oxide). Each substance is explored in detail, not only with information on its history, pharmacology, preparation, and cultural and esoteric correspondences, but also the subtleties of each plant's effect on consciousness in a way that only poets can do. The whole concoction is sprinkled with abundant quotations from famous writers, creating a literary brew as intoxicating as its subject. The Pharmako series is continued in Pharmako/Dynamis (focusing on stimulants and empathsogens) and Pharmako/Gnosis (which addresses psychedelics and shamanic plants).

"A global pandemic kills much of mankind in 2021--more than two hundred million die in the U.S. in the first month alone. Dale Pendell's *The Great Bay: Chronicles of the Collapse* takes us on an unprecedented journey sixteen thousand years into the future of mankind--a future transformed by the warming of the planet and the flooding and climatic changes that results around the world. While Pendell's scope is vast, the imaginative and thought-provoking stories in *The Great Bay* focus on the lives of people in what was once California, where rising sea levels have formed a great bay in the heart of the state. These stories are not merely a warning--they show how people rediscover the old ways of living and surviving, and the world that emerges is as much utopian as dystopian."-- Publisher description.

Describes the author's experience at Burning Man, an annual arts festival in the Black Rock Desert of Nevada, using poetry, anecdotes, dialogue, and sociological and historical observations.

In many esoteric traditions, there exists an iconic or linguistic corollary between the concepts of 'poisoner' and 'sorcerer', suggesting a sinistral magical kinship. Indeed, the use of plant, animal and mineral toxins is a strand of magic originating in remotest antiquity and reaching the present day. Beyond its mundane function as an agent of corporeal harm, poisons have also served as gateways of religious ecstasy, occult knowledge, and sensorial aberration, as well as the basis of cures. Allied with Samael, the fallen serpent-angel of first transgression whose Hebrew name in some translations is 'Venom of God', this facet of magic wends through the rites of ancient Sumer and Egypt, penetrating European Necromancy, Alchemy, the arcane the rites of the Witches' Sabbath, and modern-day folk magic. *VENEFICIUM* concerns the intersection of magic and poison. Of particular note to this study are the herbs of the so-called 'Devil's Garden', which bear relation to the allied witchcraft concepts of the Graal of Midnight, the Witches' Supper, and the flying ointment of the witches which has exerted fascination over scholars, historians, and practitioners alike. Beyond consideration of the toxicological dimensions of magical power, the related threads of astral and philosophical poisons are also examined, and their resonance and dissonance with magical practice explored. *VENEFICIUM* will be of interest to students of magic, witchcraft, alchemy, botanical folklore, medicine, and occult pharmacology.

The essential book on CBD as medicine This practical, accessible guide to using CBD-dominant cannabis contains a wealth of information for both first-time explorers and experienced patients who want to know more about safely treating a number of health conditions with

remarkable results and low to no psychoactivity or negative side effects. CBD (cannabidiol) is a component of cannabis that can provide relief for conditions such as seizures, pain, inflammation, anxiety, depression, arthritis, and a number of other issues. This book offers guidance on various forms of the medicine such as oil infusions, alcohol-based tinctures, capsules, and CO2 concentrated extracts. The information is organized by health condition and also by recommended CBD-rich strains, which do not produce the "highs" associated with THC. With dosage suggestions, potential side effects and contraindications, and the pharmacology of the plant, this is an essential guide for both doctors and patients looking for a nontoxic alternative to opiate-based pain medications and other pharmaceuticals. While cannabis has been used for medicinal and recreational purposes for thousands of years, only in the last fifty years have scientists begun to shed light on the chemistry of the plant and its interactions with the human body. Research has led to the discovery of a whole new system in the body, the endocannabinoid system, which plays a role in mediating functions such as appetite, immunity, mood, pain response, and memory. The authors present case studies, interviews with doctors who prescribe cannabidiol products, and the latest research regarding other active phytocannabinoids and terpenoids present in cannabis that are being studied for medical use. They also address the difference between CBD products derived from industrial hemp or in a lab, versus those made from medical marijuana using the whole plant. In addition to offering the most up-to-date and comprehensive information on CBD-dominant cannabis therapy for humans, this book is the first to offer guidance for using the medicine for animals, with suggestions for dosage and delivery and useful forms and strains for common health issues in pets. Finally, the authors take a look at the future of cannabis medicine, charting trends in the legalization movement and suggesting how CBD might be used to fight the opioid epidemic.
