program, the manager decides
to make the following
simplifying assumptions: 1.

~~A Production Planning Problem~~

Material requirements
planning is a production
planning, scheduling, and
inventory control system
used to manage manufacturing
processes. Most MRP systems
are software-based, but it
is possible to conduct MRP
by hand as well. An MRP
system is intended to
simultaneously meet three
objectives: Ensure raw
materials are available for
production and products are
available for delivery to
customers. Maintain the
