Chapter 7 - Summary

Psychology and the Challenges of Life ...

A major goal of psychology is to predict behavior by understanding its causes. Making predictions is difficult in part because people vary and respond differently in different situations. Individual differences are the variations among people on physical or psychological dimensions.

Researchers working in the field of psychology face many challenges. Lack of objective measurement: One of the biggest challenges faces by researchers is lack of objective data. There is no objective way to measure our moods and emotions. You can only get a subjective measurement from the test subject via survey.
