This User ' s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User ' s Guide was created by researchers affiliated with AHRQ ' s Effective Health Care Program, particularly those who participated in AHRQ ' s DECIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

With the rapid development of China ' s insurance industry and the opening of the Chinese insurance market to the world, Chinese insurance law and regulation has become an increasingly relevant topic for insurance practitioners and academics. The Regulation of Insurance in China therefore provides a much needed analysis of the Chinese regulatory system. This is the first systematic text written in English on the regulation of insurance in China and provides a comprehensive and systematic analysis of rules of law and administrative regulations on China ' s insurance industry and insurance market, covering four level of regulatory hierarchy – the statutory law, the regulations enacted by the central government (the State Council), the regulations developed by the insurance supervision and regulation authority of the State Council, and self-regulations by the insurance industry. This book is essential reading for insurance companies and legal practitioners looking to do business in China, as well as reference for lawyers practising insurance law. It is also a useful resource for students and academics studying Chinese law.

Contains 16 papers that emerged from the Survey Data Quality Control Workshop in Oak Ridge, Tennessee, April 1988. The volume is based on two premises: many useful data quality control practices have gone undocumented, and would benefit the quality control community; and better interaction among the

This book helps simplify the complexities of insurance entity regulatory compliance. Whether performing audit engagements or management at an insurance entity, the 2018 edition of this guide is a must-have resource to keep abreast of recent regulatory changes related to the life and health insurance industry, its products and regulatory issues, and the related transaction cycles that an insurance entity is involved with. New to the 2018 edition: This edition covers recent regulatory updates related to the Affordable Care Act and provides guidance for new standards that impact life and health insurance, including revenue recognition, financial instruments, leases, and more.

Get authoritative accounting and auditing guidance. Educate staff on the property and liability insurance industry, its products and regulatory issues, and the related transaction cycles an insurance entity is involved with. This guide contains updates on current GAAP and statutory accounting and audit guidance, as well as relevant guidance contained in standards issued through September 1, 2018 which have a major impact on insurance entities, including: FASB ASU No. 2016-01 and AICPA Q&A Section 7100.15: Insurance Companies and the Definition of Public Business Entity Revenue Recognition Implementation Issue: Considerations for Applying the Scope Exception in FASB ASC 606-10-15-2 and 606-10-15-4 to Contracts Within the Scope of FASB ASC 944
