Rastafari: Roots and Ideology by Barry Chevannes

As a spiritual philosophy, Rastafarianism is linked to societies of runaway slaves or maroons and derives from both the African Myal religion and the Revivalist Zion churches. Like the revival movement, Rastafarianism embraces the 400-year-old doctrine of repatriation.

The first comprehensive work on the origins of the Jamaica-based Rastafaris, including interviews with some of the earliest members of the movement. Rastafari is a valuable work with a rich historical and ethnographic approach that seeks to correct several misconceptions in existing literature—the true origin of dreadlocks for instance. Reveals the personal experiences of those who adopted the Rastafari religion in the 1950s to 1970s. This title explores the identity development of the religion, demonstrating how shifts in the movement's identity have led some of the elder Rastafari to adopt, embrace, and internalize Rastafari and Blackness as central to their concept of self.

From its obscure beginnings in Jamaica in the early 1930s, Rastafari has grown into an international socio-religious movement. It is estimated that 700,000 to 1 million people worldwide have embraced Rastafari, and adherents of the movement can be found in most of the major population centres and many outposts of the world. Rastafari: A Very Short Introduction provides an account of this widespread but often poorly understood movement. Ennis B. Edmonds looks at the essential history of Rastafari, including its principles and practices and its internal character and configuration. He examines its global spread, and its far-reaching influence on cultural and artistic production in the Caribbean and beyond. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. Dread Talk examines the effects of Rastafarian language on Creole in other parts of the Carribean, its influence in Jamaican poetry, and its effects on standard Jamaican English. This revised edition includes a new introduction that outlines the changes that have occurred since the book first appeared and a new chapter, "Dread Talk in the Diaspora," that discusses Rastafarian as used in the urban centers of North America and Europe. Pollard provides a wealth of examples of Rastafarian language-use and definitions, explaining how the evolution of these forms derives from the philosophical position of the Rasta speakers: "The socio-political image which the Rastaman has had of himself in a society where lightness of skin, economic status, and social privileges have traditionally gone together must be included in any consideration of Rastafarian words " for the man making the words is a man looking up from under, a man pressed down economically and socially by the establishment."

An important center of dancehall reggae performance, sound clashes are contests between rival sound systems: groups of emcees, tune selectors, and sound engineers. In World Clash 1999, held in Brooklyn, Mighty Crown, a Japanese sound system and the only non-Jamaican competitor, stunned the international dancehall community by winning the event. In 2002, the Japanese dancer Junko Kudo became the first non-Jamaican to win Jamaica's National Dancehall Queen Contest. High-profile victories such as these affirmed and invigorated Japan's enthusiasm for dancehall reggae. In Babylon East, the anthropologist Marvin D. Sterling traces the history of the Japanese embrace of dancehall reggae and other elements of Jamaican culture, including Rastafari, roots reggae, and dub music. Sterling provides a nuanced ethnographic analysis of the ways that many Japanese involved in reggae as musicians and dancers, and those deeply engaged with Rastafari as a spiritual practice, seek to reimagine their lives through Jamaican culture. He considers Japanese performances and representations of Jamaican culture in clubs, competitions, and festivals; on websites; and in song lyrics, music videos, reggae magazines, travel writing, and fiction. He illuminates issues of race, ethnicity, gender, sexuality, and class as he discusses topics ranging from the cultural capital that Japanese dancehall artists amass by immersing themselves in dancehall culture in Jamaica, New York, and England, to the use of Rastafari as a means of critiquing class difference, consumerism, and the colonial pasts of the West and Japan. Encompassing the reactions of Jamaica's artists to Japanese appropriations of Jamaican culture, as well as the relative positions of Jamaica and Japan in the world economy, Babylon East is a rare ethnographic account of Afro-Asian cultural exchange and global discourses of blackness beyond the African diaspora.

When we think of Ethiopia we tend to think in cliches. Solomon and the Queen of Sheba, the Falasha Jews, the epic reign of Emperor Haile Selassie, the Communist Revolution, famine and civil war. Among the countries of Africa it has a high profile yet is poorly known. How- ever all cliches contain within them a kernel of truth, and occlude much more. Today's Ethiopia (and its painfully liberated sister state of Eritrea) are largely obscured by these mythical views and a secondary literature that is partial or propagandist. Moreover there have been few attempts to offer readers a comprehensive overview of the country's recent history, politics and culture that goes beyond the usual guidebook fare. Understanding Contemporary Ethiopia seeks to do just that, presenting a measured, detailed and systematic analysis of the main features of this unique country, now building on the foundations of a magical and tumultuous past as it struggles to emerge in the modern world on its own terms.

Moving Beyond Borders is the first book-length history of Black health care workers in Canada, delving into the experiences of thirty-five postwar-era nurses who were born in Canada or who immigrated from the Caribbean either through Britain or directly to Canada. Karen Flynn examines the shaping of these women's stories from their childhoods through to their roles as professionals and community activists. Flynn interweaves oral histories with archival sources to show how these women's lives were shaped by their experiences of migration, professional training, and family life. Theoretical analyses from postcolonial, gender, and diasporic Black Studies serve to highlight the multiple subjectivities operating within these women's lives. By presenting a collective biography of identity formation, Moving Beyond Borders reveals the extraordinary complexity of Black women's history.

A collection of essays written over the last 10 years.

In a time of intellectual uncertainty, the question of how we know what we do about human lives becomes ever more pressing. The essays collated in this volume argue that anthropology can be used to acknowledge, explore and interpret divergence and ideological conflict over human meaning. Using questions raised as part of the Enlightenment movement, this volume is structured around some of the key themes the Enlightenment fostered, including human nature, time, Earth and the Cosmos, beauty, order, harmony and design, moral sentiments, and the query of whether wealthy nations make for healthy publics. The volume focuses in particular on how 'moral sentiment' offered a guiding idea in Enlightenment thought. The idea of 'moral sentiment' is central to the essays' grappling with the ethical anxieties of contemporary anthropology. The essays therefore trace historical connections and fissures and focus on Adam Smith's attempts toward an understanding of what would later be called 'modernity'. With an afterword from Marilyn Strathern, this volume will be a strong addition to the Association of Social Anthropologists conference proceedings.
