Much has been written in the West on the history of the Soviet space program but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoirs of Academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Twenty-seven years later, he became deputy to the founding figure of the Soviet space program, the mysterious " Chief Designer " Sergey Korolev. Chertok's sixty-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes, Academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. In Volume 1, Chertok describes his early years as an engineer and ends with the mission to Germany after the end of World War II when the Soviets captured Nazi missile technology and expertise. Volume 2 takes up the story with the development of the world's first intercontinental ballistic missile (ICBM) and ends with the launch of Sputnik and the early Moon probes. In Volume 3, Chertok recollects the great successes of the Soviet space program in the 1960s including the launch of the world's first space voyager Yuriy Gagarin as well as many events connected with the Cold War. Finally, in Volume 4, Chertok meditates at length on the massive Soviet lunar project designed to beat the Americans to the Moon in the 1960s, ending with his remembrances of the Energiya-Buran project. You will encounter some kind of health adversity in life. Doctors can only take you so far. You will have to do the rest yourself. This book is a near comprehensive resource guide to point you in a lot of different directions that might help you in some way. If all of a sudden you get into an accident or get a serious disease, you don't have time to sift through the hundreds of health books at #610 to #619 at the library or cruise the web looking for answers some of which are a massive rip-off. I'll give you a case in point. I was on a holistic cancer website where they give about 25 pages of solid knowledge for free then I went on another one with a ten page sales pitch ending with "Only \$97 and you'll get all these reports about 12 obscure holistic cancer therapies."
