How to Prove It - Solutions

If a relation is preorder, it means it is reflexive and transitive. Thus we will prove these two properties to prove the relation as preorder.

Suppose $f \in \mathcal{F}$. Thus for $a = 1$ and $c = 1$, we have

How to Prove It
Velleman

case, either prove P or prove Q .

Another strategy can be: If P is true, then clearly the goal $P \vee Q$ is true, so only need to worry about the case in which P is false. Thus for the case P is false, complete the proof by proving that
