The 3G Way is an introduction to the management style developed by three Brazilian entrepreneurs who took over some of the main icons of American capitalism: Anheuser Busch, Heinz and Burger King.

"My friend — and now partner — Jorge Paulo and his team are among the best businessmen in the world. He is a fantastic person and his story should be an inspiration to everybody, as it is for me." — Warren Buffett In just over forty years, Jorge Paulo Lemann, Marcel Telles and Beto Sicupira built the biggest empire in the history of Brazilian capitalism and launched themselves onto the world stage in an unprecedented way. Over the past five years, they have acquired no fewer than three globally-recognized American brands: Budweiser, Burger King and Heinz. This has been achieved as discreetly as possible and they have shunned any personal publicity. The management method they developed, which has been zealously followed by their employees, is based on meritocracy, simplicity and constant cost cutting. Their culture is as efficient as it is merciless and leaves no room for mediocre performances. On the other hand, those who bring in exceptional results have the chance to become company partners and make a fortune. Dream Big presents a detailed behind-the-scenes portrait of the meteoric rise of these three businessmen, from the founding of Banco Garantia in the 1970s to the present day.

How the King of Beers collapsed without a fight and what it means for America's place in the post-Recession world How did InBev, a Belgian company controlled by Brazilians, takeover one of America's most beloved brands with scarcely a whimper of opposition? Chalk it up to perfect timing—and some unexpected help from powerful members of the Busch dynasty, the very family that had run the company for more than a century. In Dethroning the King, Julie MacIntosh, the award-winning financial journalist who led coverage of the takeover for the Financial Times, details how the drama that unfolded at Anheuser-Busch in 2008 went largely unreported as the world tumbled into a global economic crisis second only to the Great Depression. Today, as the dust settles, questions are being asked about how the "King of Beers" was so easily captured by a foreign corporation, and whether the company's fall mirrors America's dwindling financial and political dominance as a nation. Discusses how the takeover of Anheuser-Busch will be seen as a defining moment in U.S. business history Reveals the critical missteps taken by the Busch family and the Anheuser-Busch board Argues that Anheuser-Busch had a chance to save itself from InBev's clutches, but infighting and dysfunctionality behind the scenes forced it to capitulate From America's heartland to the European continent to Brazil, Dethroning the King is the ultimate corporate caper and a fascinating case study that's both wide reaching and profound.

The Internet is often called a superhighway, but it may be more analogous to a city: an immense tangle of streets, highways, and interchanges, lined with homes and businesses, playgrounds and theatres. We may not physically live in this city, but most of us spend a lot of time there, and even pay rents and fees to hold property in it. But the Internet is not a city of the 21st century. Jeffrey Hunker, an internationally known expert in cyber-security and counter-terrorism policy, argues that the Internet of today is, in many ways, equivalent to the burgeoning cities of the early Industrial Revolution: teeming with energy but also with new and previously unimagined dangers, and lacking the technical and political infrastructures to deal with these problems. In a world where change of our own making has led to unexpected consequences, why have we failed, at our own peril, to address these consequences? Drawing on his experience as a top expert in information security, Hunker sets out to answer this critical question in Creeping Failure. Hunker takes a close look at the "creeping failures" that have kept us in a state of cyber insecurity: how and why they happened, and most crucially, how they can be fixed. And he arrives at some stunning conclusions about the dramatic measures that we will need to accomplish this. This groundbreaking book is an essential first step toward understanding the World Wide Web in a larger context as we try to build a safer Internet "city." But it also raises issues that are relevant far outside the online realm: for example, how can we work together to create not just new policy, but new kinds of policy? Creeping Failure calls for nothing less than a basic rethinking of the Internet — and of how we solve problems together.
