[Stages of Dementia | Zaldy Tan, MD | UCLAMDChat](#) The Dementia Care Bundle Health

A care bundle is a set of interventions that, when used together, significantly improve patient outcomes and when multidisciplinary and multi-agency teams work together there are proven benefits to patients and their carers. National audits and research show us that patients with dementia in acute hospitals experience poorer outcomes for all types of admission, stay longer in hospital, and are more likely to be discharged to a care home rather than to their own home.
