The Nature and Power of Interests 3 To quantitatively evaluate the effect size of this inter-est-performance relationship, we conducted a meta-analysis on studies that examined the correlation between interests and performance over the past 70 years, dating from Strong's pioneering work up to the present time (Nye et al., 2012).

The Nature and Power of Interests

Power itself is a basic ontological concept and, like being, indefinable. However, we can bracket its qualities to provide meaning and understanding of its nature, and thus power functions as "linkage," as "will-to-completeness," as imminent "energy," as "strength-of-becoming," and as "force-towards-identity."
