Steven Mithen's The Prehistory of the Mind is an ambitious attempt to build a model of the evolutionary history of the mind from archaeological evidence. Whilst the book has much to commend it as an accessible and comprehensive introduction, both to the relevant palaeoanthropological models and to contemporary theories of the mind derived by psychologists and cognitive scientists, its claims to have sought and found 'the cognitive foundations of art, religion and science' are exaggerated.

Cognitive fluidity is a term first popularly applied by Mithen in his book The Prehistory of the Mind, a search for the origins of Art, Religion and Science. The term cognitive fluidity describes how a modular primate mind has evolved into the modern human mind by combining different ways of processing knowledge and using tools to create a modern civilization.
