For readers of Atul Gawande and Paul Kalanithi, a palliative care doctor's breathtaking stories from 30 years spent caring for the dying. Modern medical technology is allowing us to live longer and fuller lives than ever before. And for the most part, that is good news. But with changes in the way we understand medicine come changes in the way we understand death. Once a familiar, peaceful, and gentle -- if sorrowful -- transition, death has come to be something from which we shield our eyes, as we prefer to fight desperately against it rather than accept its inevitability. Dr. Kathryn

Mannix has studied and practiced palliative care for thirty years. In *With the End in Mind*, she shares beautifully crafted stories from a lifetime of caring for the dying, and makes a compelling case for the therapeutic power of approaching death not with trepidation, but with openness, clarity, and understanding. Weaving the details of her own experiences as a caregiver through stories of her patients, their families, and their distinctive lives, Dr. Mannix reacquaints us with the universal, but deeply personal, process of dying. With insightful meditations on life, death, and the space between them, *With the End in Mind* describes the possibility of meeting death gently, with forethought and preparation, and shows the unexpected beauty, dignity, and profound humanity of life coming to an end.

discover how other cultures care for the dead. From Zoroastrian sky burials to wish-granting Bolivian skulls, she investigates the world ' s funerary customs and expands our sense of what it means to treat the dead with dignity. Her account questions the rituals of the American funeral industry—especially chemical embalming—and suggests that the most effective traditions are those that allow mourners to personally attend to the body of the deceased. Exquisitely illustrated by artist Landis Blair, *From Here to Eternity* is an adventure into the morbid unknown, a fascinating tour through the unique ways people everywhere confront mortality.

The world likes to believe life is a series of endings. Some are good, others bad, but things always end. In the modern age, the movie ends, the television show ends, the book finishes with "The End", and we start to believe life is about endings. Yet life continues, without end. Recently, my young nephew died, but the next day life went on without him. This book is based on the premise that endings are just new beginnings. Everyone can end, with the beginning in mind. Giving up the concept of "everything ends" is one of the most important steps in business continuity. People love to talk about Succession Planning, but few ever accomplish the task. The numbers are staggering. The US Department of Labor Statistics tell us after one year in business, 20% of new

businesses in America fail, but after 20 years only about 20% of those same businesses will have survived. Of those who survive, less than 20% will continue to a second generation! Most businesses have a cessation plan (a plan that leads to a business ceasing to exist), while very few have succession plans (a plan that leads to a business not only continuing, but thriving after the founder exits). In his book, "Always End with the Beginning in Mind", Donald White takes you on his journey that resulted in a successful business continuation, and will give a founder of a business the steps necessary for a succession plan to actually succeed. A well-thought out and properly executed Succession Plan is a classic win-win. In fact, it is a win-win-win. It is a win for the company, namely the clients and staff who are able to enjoy continuity after

the founder's exit. It is a win for the successor, who is able to build on the success of the founder. Finally, it is a win for the founder, who is able to exit on their own volition and see what they have built continue to prosper for years to come. Firms can succeed into perpetuity. They do not need to eventually cease. A businessperson who exits a business without seeing their exit as an ending, but as a new beginning, both for themselves and the business, can enjoy seeing the firm they spent a lifetime building continue to prosper after the business transitions to new leadership and simultaneously enjoy a new season of life personally. Do not leave business continuity to fate! Read this book and discover the tools necessary to move from a reactive cessation plan to a proactive plan of succession.

Residing on the border between poetry and prose, Emma Healey masterfully navigates the tension and balance between the two forms. Her writing examines the animate qualities of seemingly inanimate things and explores personal relationships, collective and individual human experiences, as they are distilled through our encounters with such things as the CBC, chain bookstores, the contents of a kitchen, or the expanse of a whole city. *Begin With the End in Mind* tests the capabilities of the prose poem--the specific rhythmic, lyrical, and syntactic possibilities of the form, and the opportunities for play, renegotiating the more traditional/technical elements of lyric and line that are afforded the prose poet.

The Roman Empire has been a source of inspiration and a model for imitation for Western empires practically since the moment Rome fell. Yet, as Julia Hell shows in *The Conquest of Ruins*, what has had the strongest grip on aspiring imperial imaginations isn't that empire's glory but its fall—and the haunting monuments left in its wake. Hell examines centuries of European empire-building—from Charles V in the sixteenth century and Napoleon's campaigns of the late seventeenth and early eighteenth centuries to the atrocities of Mussolini and the Third Reich in the 1930s and '40s—and sees a similar fascination with recreating the Roman past in the contemporary image. In every case—particularly that of the Nazi regime—the ruins

of Rome seem to represent a mystery to be solved: how could an empire so powerful be brought so low? Hell argues that this fascination with the ruins of greatness expresses a need on the part of would-be conquerors to find something to ward off a similar demise for their particular empire.

The Croak Book provides a simple check-off list for ensuring that your loved ones have what they need in the event of your demise. The author pulls on his 20 years of experience as an Episcopal Priest in Pastoral Ministry and provides both practical suggestions and commentary around the things needing to be done and the events associated with a death. While written from within a Christian framework, most of the practical issues surrounding death transcend religious

Steve Barkley's concept of "backwards planning" shifts the process of teaching practices, coaching, and professional staff development in significant and comprehensive ways. Steve's research suggests that teachers don't cause student achievement; students do, when armed with the right learning behaviors taught and modeled by others. From those behaviors, they become lifelong learners. Receive guidance and insights into specific coaching skills, questioning strategies, and ways to work with principals. The
