"This counterintuitive and powerfully effective approach to creativity demonstrates how every corporation and organization can develop an innovative culture. The traditional attitude toward creativity in the American business world is to 'think outside the box'-- to brainstorm without restraint in hopes of coming up with a breakthrough idea, often in moments of crisis. Sometimes it works, but it's a problem-specific solution that does nothing to engender creative thinking more generally. 'Inside the Box' demonstrates Systematic Inventive Thinking (SIT), which systemizes creativity as part of the corporate culture."--Provided by

The Killer Questions Your Company Should Be Asking
Generating and executing great ideas is the key to staying ahead in a rapidly changing world. It seems so basic. Why is it so hard to actually get right? According to innovation expert Phil McKinney, the real problem is that we're teaching people to ask the wrong questions about their businesses--or none at all. There has to be a better way. In *Beyond the Obvious*, McKinney will

Shared for the first time here, these "Killer Questions" include: What are the rules and assumptions my industry operates under? What if the opposite were true? What will be the buying criteria used by my customer in 5 years? What are my unshakable beliefs about what my customers want? Who uses my product in ways I never anticipated?
